

Commercial & Public-Sector Solar That Delivers Savings

Sustainable energy solutions for organisations committed to reducing costs, lowering carbon emissions, and achieving long-term energy independence.

Helping You Achieve Net Zero and Save Money

We deliver funded renewable-energy projects that cut operating costs, reduce carbon emissions, and create long-term financial savings. Our solutions provide a clear, low-risk route to net zero without the need for large upfront capital investment.

1. Funded through operational budgets

Access OpEx-based funding options that remove the need for capital expenditure and make projects easier to approve.

2. Predictable long-term energy costs

Generate your own electricity and reduce exposure to volatile grid pricing, creating stable, long-term savings.

3. Significant savings after payback

Once the system has paid for itself, your organisation benefits from years of reduced energy bills and ongoing financial returns.

Making Net Zero Simple

We provide a complete, end-to-end service that removes complexity and delivers measurable results.

- ✓ Solar PV Solutions
- ✓ Battery Energy Storage
- ✓ Car Park Solar Canopies
- ✓ Energy Funding
- ✓ Complete Project Management
- ✓ HVAC Air conditioning
- ✓ Tariff Optimisation & Site Audit
- ✓ EV Charging

Sustainable Energy Solutions

At NetOPlus, we help commercial organisations and public-sector estates transition to cleaner, more affordable energy through funded and fully managed renewable-energy projects.

From initial assessment to installation and ongoing support, we provide a straightforward route to long-term savings and carbon reduction.

Solar PV Systems

Professionally designed solar installations that reduce electricity costs for commercial buildings and public-sector estates.

Battery Storage

Store excess energy for use when you need it, increasing efficiency and reducing reliance on the grid.

HVAC Systems

Energy-efficient heating, ventilation, and air-conditioning solutions that lower consumption and carbon emissions.

Solar Car Park Canopies

Generate renewable energy while making better use of existing parking areas.

Energy Funding Solutions

Access funding options that remove large upfront costs and allow projects to pay for themselves through savings.

Tariff Optimisation & Site Audits

We analyse your energy usage and tariff structure to uncover inefficiencies, reduce costs, and support regulatory compliance.

Why Choose NetOPlus?

Our Approach

- ✓ Free Initial Consultation
- ✓ Site Survey & Feasibility
- ✓ Funding Support
- ✓ Design & Installation
- ✓ Project Management
- ✓ Measurable Return on Investment
- ✓ Verified Installation Partners
- ✓ Transparent Reporting

We provide one trusted point of contact from concept to completion, ensuring your renewable-energy project is delivered smoothly, safely, and with clear financial benefits.

What You Gain

Reduce Energy Costs

Lower your electricity bills through renewable energy generation.

Achieve Net Zero

Support sustainability targets with measurable carbon reductions.

Energy Independence

Reduce reliance on volatile energy prices by generating your own electricity.

Future-Proof Your Organisation

Invest in long-term renewable infrastructure that delivers environmental and financial benefits.

A Simple, Transparent Journey

We guide you through the entire process — from free on-site survey to funding options and a clear ROI plan. Your monthly and annual costs can fall below your current energy bills, followed by years of free, clean energy.

Consultation

01

We discuss your energy requirements and sustainability goals.

Site Assessment

02

Our specialists evaluate your property and identify the best solution.

Funding

03

We help identify suitable funding options to minimise upfront investment.

Installation

04

Trusted installation partners deliver your project safely and efficiently.

Ongoing Savings

05

Generate clean energy, reduce operating costs and move confidently towards net zero.
